EBF In the Summertime

August 2012

EBF students have a large number of opportunities to take classes in the summertime to count toward their degree requirements. These classes are offered in residence at University Park (UP), on-line, at Penn State commonwealth campuses and at other universities. Below is a discussion of the opportunities, based on what was offered in summer 2012, and what the EBF program is planning to offer summer 2013.. So these offerings may change.

Basic Economic Classes: ECON 102, 104, and 302 are offered in person at UP and on-line. ECON 102 and 104 are offered at a number of commonwealth campuses. Each of these three classes is commonly offered by other universities.

Mathematics Classes: MATH 140 and 141 are offered in person at (probably) all campuses and on-line. If you take one of these courses at another university, we will waive the fourth credit. (Any waivers are for the EBF program. You would still need 120 credit hours to graduate.)

ACCT 211 is offered at a large number of places. I suggest you take this on-line, as accounting lectures are not very popular. If you take a three credit accounting course, it can count for 211, as we will waive the fourth credit.

Business Law: BA 243 (4 credits) is offered on-line. BLAW 243 is not offered at UP, but equivalents may be available at other campuses. Again, a 3 credit course is fine.

Computer Science: CMPSC 101, 201, and 121 are offered at all campuses. You can take the equivalent at another university, but make sure it teaches you a programming language.

ENGL 202 is offered at all campuses and on-line.

EBF 200 is offered on-line.

EBF 301 is offered on-line.

EBF 401 is not offered, however FIN 304W is offered at UP and will be accepted for EBF 401.

EBF 489 is offered on-line starting summer 2013.

STAT 401 is offered at UP. Statistics courses at other universities require a calculus prerequisite, which is hard to find.

400 level electives offered at UP are ECON 306, ECON 402, FIN 406, FIN 407, and FIN 408.

400 level electives offered on-line are EGEE 401, EME 444, EME 466, GEOG 432, and GEOG 469.
In addition, a large number of introductory EMS classes are available on-line or in person. Students can have the opportunity to choose from a long list of general education electives.
