EBF In the Summertime, 2016 Edition

January 2016

EBF students have a large number of opportunities to take classes in the summertime to count toward their degree requirements. These classes are offered in residence at University Park (UP), on-line, at Penn State commonwealth campuses and at other universities. Below is a discussion of potential summertime course opportunities for 2016. Since this is being written in January, summer offerings are always subject to change. The latest information on summer classes is always available from the Schedule of Courses: http://schedule.psu.edu.

**Basic Economics Classes:** ECON 102, 104, and 302 are offered in person at UP and on-line. ECON 102 and 104 are offered at a number of commonwealth campuses. Each of these three classes is commonly offered by other universities and transferring credit to Penn State is not normally a problem.

**Mathematics Classes:** MATH 140 and 141 are offered in person at most campuses and on-line. If you take one of these courses at another university, and it is equivalent in content to MATH 140/141 but is only three credits, we will allow it to count in place of MATH 140/141. (The fourth credit would be a free elective.)

**ACCT 211** is offered at a large number of places and many EBF students choose to take accounting on-line or at another institution rather than taking Penn State’s version. If you take a three credit accounting course, it can count for 211, with the fourth credit being a free elective.

**Business Law:** While BA 243 or BLAW 243 is not available over the summer, equivalents may be available at other campuses. Again, a 3 credit course is fine.

**Computer Science:** CMPSC 101, 201, and 121 are offered at several campuses (although not at University Park or on-line). You can take the equivalent at another university, but make sure it teaches you a programming language.

**ENGL 15** and **ENGL 202** are offered at most campuses and on-line.

**EBF 200** is offered on-line, through UP or the World Campus.

**EBF 301** is offered on-line through UP or the World Campus.

**EME 460** is sometimes available online during the summer. Please check the schedule of courses before planning to take this course as a summer offering.

**FIN 301** is offered at a number of Commonwealth Campuses, but be sure you have all the prerequisites! EBF will accept FIN 301 in place of EBF 401.
FIN 305W is offered at University Park. EBF students can use this course in place of EBF 401 or EBF 304W, but not both.

STAT 401 is offered at University Park. Statistics courses at other universities require a calculus prerequisite, which can be hard to find.

400 level electives acceptable for EBF offered at UP are PL SC 444, FIN 406, FIN 408, and FIN 410.

400 level electives acceptable for EBF offered on-line are GEOSC 402Y, GEOG 430, and GEOG 431.

In addition, a large number of introductory EMS classes are available on-line or in person. Students can have the opportunity to choose from a long list of general education electives.
